

Painting A Perfect Smile

*Working together
so you can enjoy
the benefits
of good dental health.*

*“Making the time
we spend together
pleasant and rewarding”*

Welcome and thank you for coming to our office. We will work to make the time we spend together pleasant and rewarding. We offer all types of comprehensive dental services. The major portion of our visits with you will be in controlling dental disease and preventing its recurrence. We have found this approach easier, more fun and less expensive.

*“Teaching you to control
your dental health”*

Your health is our prime concern. Our goal is the total elimination of dental disease so you can enjoy the benefits of good dental health. In our office we have developed a unique approach to achieving this goal—the Dental Fitness Program. It is designed to help you save your teeth. With this program we can teach you to control dental disease and to understand how bacteria cause the disease. We call it prevention.
